

## Science & Nature

1) According to Apollo Astronauts, the moon smells like;

A) Cheese	B) Coffee
C) <b>Gunpowder</b>	D) Petrol

2) The plant and skin of this fruit can cause contact dermatitis and other symptoms of poison ivy

A) Kiwi	B) Pomegranate
C) <b>Mango</b>	D) Papaya

3) Chocolate contains theobromine and a little caffeine. A 1-ounce square of chocolate has as much caffeine as:

A) Half a can of coke	B) A glass of iced tea
C) A cup of regular coffee	<b>D) A cup of de-caf coffee</b>

4) Which contains the least caffeine?

A) Cup of coffee	<b>B) A shot of espresso</b>
C) A cup of green tea	D) A cup of black tea

5) All of these animals move very quickly, but which is the fastest?

A) Cheetah	<b>B) Peregrine Falcon</b>
C) Horsefly	D) Black Marlin

Fun fact - While the cheetah is the fastest land animal, it only runs at 68-75 mph. The peregrine falcon is the fastest animal on this list, clocking flight as high as 389 km/h or 242 mph

6) Every person is different, but just how much do you differ, genetically, from other humans?

A) 25%	B) 10%
<b>C) 0.1%</b>	D) 2%

Fun Fact – Generally between 0.1% - 1%, so, we share at least 99% of your DNA with any other person

**7) Lobster blood is blue once it is exposed to air. What colour is it inside a living lobster?**

A) Blue	<b>B) Clear</b>
C) Red	D) Yellow

Fun fact - The blue colour of lobster blood comes from copper-based hemocyanin, but it isn't blue until it's exposed to air. It's also found in spiders and certain other arthropods.

**8) Scientist have studied public restroom stall use. The toilet used the least may have fewest germs. Which stall is this?**

<b>A) 1<sup>st</sup> door on left</b>	B) 1 <sup>st</sup> door on right
C) Any middle door	D) Furthest from the entrance

**9) What is an Olm?**

A) A baby dragon	<b>B) An aquatic salamander</b>
C) A unit of electrical resistance	D) An ancient tree

**10) What creatures do farmers in Kenya often use to deter elephants?**

<b>A) Bees</b>	B) Dogs
C) Mice	D) Alpacas
