or call us on 0118 988 5688

Thrive’s Vision
People living with a disability or ill-health, or who are isolated, disadvantaged or vulnerable, have the opportunity to access therapeutic gardening and horticulture programmes, wherever they live, and are actively encouraged to use gardening as part of their personal health and wellbeing management.

You are wonderful to Emma. She is so happy at Thrive. Thank you.
- Emma’s Grandad

The gardening for health charity

Reading, Trunkwell Gardens

Thrive, The Society for Horticultural Therapy, Hargrave Office, The Ashley Vale Centre, South Hill, Reading, RG7 2AF
A charity registered in England and Wales (no. 277570), and in Scotland, as a charity operating in England and Wales. Registered company (no. 1410708)
You can even hire our training rooms for your meeting!
Being an approved training centre enables us to deliver certified practical horticultural qualifications to both young people (16+) and adults wanting to get started in the world of horticulture.

To support our client gardeners further, we undertake extra activities surrounding horticulture such as cooking, where clients may learn new skills as we encourage a better understanding of the seed to plate relationship using our fully accessible kitchen. We are fortunate at Reading to have a number of cabins, classrooms and quiet rooms where the therapists can work with clients on specific activities or escape from the more inclement weather! Our community-based settings provide our client gardeners with a range of extra options beyond the Trunkwell garden e.g conservation work. This helps to further promote social inclusion through opportunities to connect with others, build independence and support people with a range of transferable skills enabling them to be valued and active citizens in their communities.

Making a referral

People come to us through a variety of referral paths. Some are referred by their GP or health and social care professional, others may self-refer or be referred by a family member, school or other organisation. Whatever the referral route, we can discuss individual needs to ensure the programme options are appropriate.

Today, with our National Office in Reading, Berkshire, we provide social and therapeutic horticulture (STH) programmes from our three regional centres located at Battersea Park in London, King’s Heath Park in Birmingham and here at Trunkwell gardens in Reading. Additionally, we run a range of outreach programmes from our regional centres in care homes, hospitals, schools and other community settings.

As the leading gardening for health charity, we know that gardening can bring profound positive change, from improvements in physical and mental well-being to the transformation of skills, knowledge and abilities. Thrive has over 40 years’ experience and a wealth of evidence to support this.

Thrive uses an approach called Social and Therapeutic Horticulture (STH), where trained horticultural therapists work with plants and people to improve an individual’s physical and psychological health, communication and thinking skills.

Our People and Our Gardens

The Trunkwell Gardens at Beech Hill near Reading are situated within three acres of beautiful grounds and are part of Thrive’s National Office, The Geoffrey Udall Centre. The gardens provide an accessible, supportive, safe and tranquil environment in which to work and there is a strong sense of positivity, pride and community here. The garden space is divided into a number of smaller distinct areas to increase the plant diversity and provide opportunities to create a wide and diverse range of rich sensory experiences. These areas are designed to provide calming and reflective experiences alongside others which are stimulating and enabling.

The therapist will focus on each individual that comes to Thrive, building a set of activities aimed at improving their particular health needs to achieve goals identified by the client gardener, their family, carer or support worker.

The ‘plot area’ has over 30 individual plots – some of the clients work with a therapist and volunteers to maintain their own area of the garden; this facilitates a great sense of ownership, responsibility and achievement as each plot is individualised according to both the needs and the creative design of the client gardener.

There are areas for growing herbs, an allotment, orchard plus butterfly and woodland gardens as well as a tree nursery, a large wildlife pond and a shop selling plants on our regular public open days. The focal point of the main garden is a large glass house – a hive of activity where our client gardeners can learn and undertake activities such as seed sewing, potting on and plant identification.

Thriving uses an approach called Social and Therapeutic Horticulture (STH), where trained horticultural therapists work with plants and people to improve an individual’s physical and psychological health, communication and thinking skills.

Our horticultural therapists use the garden as a safe and secure environment in which to develop a person’s ability to socialise, make friends and gain practical skills that make them more independent.

Social and Therapeutic Horticulture

It’s physical exercise

It’s improved mental health

It can lead to a new qualification or job

It’s a way to make new friends

It makes you feel better!

It’s NOT JUST GARDENING!
